ATM Safety & Security

The convenience available with ATMs carries an increased need for security and caution. ATMs are located just about everywhere, and are available 24/7.

To protect your identity and to ensure your personal safety, exercise caution when using an ATM.

- Protect your ATM card as if it were cash; report lost or stolen cards immediately.
- Safeguard your PIN – don't give your PIN to anyone, don't write it on your card and avoid using numbers that are easily identified (birth date, etc.).
- Never leave your receipt behind – even with an incomplete transaction; shred receipts before discarding them.
- Minimize your time at the machine – have your ATM card ready before you approach, be ready to enter your PIN and count your money later, not at the ATM.
- Give people ahead of you space to conduct their transactions; when you use the ATM, make sure no one watches you key in your PIN – use your body to shield the keypad.
- If you must use an ATM after dark, make sure there is ample lighting and the ATM is clearly visible from the street.

An ATM is like a branch of your credit union. Using it should be convenient, safe and secure.
